

Quality Policy

L2S Engineering Pty Ltd (**L2SE**) provides innovative and competitive services and products to the commercial and defence force shipbuilding industries. We look to deliver project-specific solutions for those we engage with whilst demonstrating a value added approach. We work hard to be the very best at what we do, every day, always searching for ways to improve.

The quality management system is regularly reviewed by management to ensure our objective of total client satisfaction is being met and that the system is suitable and effective in meeting both client and company needs.

Management will take effective action to ensure resolution of problems leading to continual improvement in our operating practices. This policy of continual improvement coupled with the provision of adequate human resources and a clear understanding of client requirements will lead to increased confidence in our ability to provide excellent products and service.

We commit all employees of L2SE to abide by ISO 9001-2015 and implement our policies and procedures in order to enhance our reputation as a client focused company.

Joe Czeschka

Managing Director
