

## Purpose

The Business Management System (BMS) that L2S Engineering Pty Ltd (L2SE) has implemented applies to all company activities. These include procurement, manufacturing, fabrication and the Project Management of the installation of insulation, sheet metal and carpentry for defence, commercial, mining, infrastructure and the oil and gas industries.

L2SE will constantly strive to establish a clear commitment to Health, Safety, Environmental and Quality, management throughout our operational activities.

## Commitment to our Stakeholders

Our BMS has been structured to ensure that our values of continual improvement, customer satisfaction and process performance are understood and shared by all. We are committed to reducing our production of waste and greenhouse gases, reducing the exposure of our employees to injuries from working at height and from the use of plant and equipment, improving employee awareness of HSE issues through training and assessing our own performance through inspection and audit.

The BMS is reviewed frequently to ensure we keep in touch with changes that could affect the BMS and allows us to keep up to date with changes in technology, legal requirements, competitive market and customer satisfaction.

We are committed to meeting all our compliance obligations, eliminating hazards and reducing health and safety risks, providing safe and healthy working conditions for the prevention of work related injury and ill health, protecting the environment and preventing pollution. This is achieved through the consultation and participation of our workforce and by setting objectives and targets to reduce our significant health safety and environmental impacts.

Management will take effective action to ensure resolution of problems leading to continual improvement in our operating practices. This policy of continual improvement coupled with the provision of adequate human resources and a clear understanding of client requirements will lead to increased confidence in our ability to provide excellent products and service.

We commit all stakeholders of L2SE to abide by ISO 9001, OHSAS 18001, AS4801 and ISO 14001 and implement our policies and procedures in order to enhance our reputation as a client focused company.
